EDUCATION

Sengunthar Engineering College

Bachelor of Engineering in Electronics and Communication Engineering
Relevant Coursework:

Sep. 2022 – Apr. 2026

Tiruchengode, Tamil Nadu

- Data Structures
- Database Management
- Oops Concept
- Artificial Intelligence
- Internet Of Things
- Computer Architecture

EXPERIENCE

Besant Technologies

Java Full Stack Development Intern

Feb. 2026 – Sep. 2026

Bangalore, India

- Learned and developed web applications using Java, HTML, CSS, JavaScript, and MySQL as part of full stack development training.
- Worked on backend development using Java and JDBC to connect applications with databases and perform CRUD operations.
- Collaborated on mini-projects using version control tools and followed software development best practices.
- Utilized Eclipse IDE and Apache Tomcat server for application development, testing, and deployment.

PROJECTS

Jarvis AI Chatbot | JavaScript, HTML, CSS, Vite, GitHub, Netlify

Dec. 2025

- Developed an AI-based chatbot web application with an interactive and responsive user interface.
- Integrated conversational features to provide real-time user interaction and smart responses.
- Designed and deployed the project using modern web technologies and hosted it on Netlify.
- Improved user experience with clean UI design, fast performance, and mobile-friendly accessibility.

Chat Application | Java, Socket Programming, JDBC, MySQL, Swing, GitHub

Jul. 2026

- Developed a real-time multi-client chat application using Java Socket Programming with a client-server architecture.
- Implemented user registration and login functionality with Java JDBC and MySQL database integration.
- Added features such as online user management, private messaging, chat history, and real-time message broadcasting.
- Implemented password change functionality and validation to improve user account management and security.

Footstep Based Power Generation Using Piezoelectric Material |

- Developed a power generation system using piezoelectric sensors to convert footstep pressure into electrical energy.
- Designed and implemented a renewable energy prototype for generating small-scale electricity in crowded public areas.
- Integrated piezoelectric materials, rectifier circuits, and energy storage components for efficient power conversion.

TECHNICAL SKILLS

Languages: Java, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, IntelliJ IDEA, Eclipse, Git, GitHub

Frameworks: Spring Boot, JDBC, React.js, Bootstrap

EXTRACURRICULAR ACTIVITIES

- Participated in technical workshops and coding activities.
- Interested in Java Full Stack Development and Web Technologies.
- Developed mini and academic projects using modern web technologies.
- Actively learning backend and frontend development concepts.
